Recruitment team, African Development Bank

Re: Applying for the professional internship

Dear Recruitment team, African Development Bank

I am writing to apply for a professional internship opportunity in the African Development Bank. I will be an asset to your company since I have relevant work experience and a strong knowledge of software development, and I also have an academic and professional background in Information Technology majoring in Software Engineering.

My experience and academic background have brought me a greater understanding of Information Technology, Software Engineering as well as software deployment since I worked as a backend developer at a US-based tech startup called LivestockCity Inc, I have worked as a backend developer consultant at N@tcom services, I have worked as a backend developer at Scrum factory and Holy soft company Ltd as described in my CV. During my period of employment at all companies I have described, I gained skills in web application development, and I believe I can use these skills to bring innovative ideas and contribute to the company's upcoming projects development once I am hired. Please find enclosed a copy of my CV, which gives further details of my education and career to date.

Should you require any further information regarding my application, please do not hesitate to contact me via the phone number or via the email mentioned at the top of this letter. I would appreciate meeting you to discuss my skills, capabilities, and professional experience in greater detail once you get time. Thank you in advance for your consideration.

Yours sincerely,

Elie Kayitare Uwiringiyimana
